

MEDICAL TECHNOLOGIST

DEPARTMENT: Laboratory Services/Biological Programs

JOB TYPE: Full time, 40 hours/week

WORK SCHEDULE: Monday-Friday, day shift; may be rare weekend coverage needed

WORK LOCATION: The aquarium's clinical pathology and water chemistry laboratories are located in the Center of Marine Biotechnology, Baltimore, MD on the next pier to the aquarium buildings

SALARY: \$40,000 per year or \$19.23 per hour

EDUCATION REQUIREMENTS: Bachelor's degree in Medical Technology, ASCP license preferred

POSITION SUMMARY: Perform clinical laboratory tests for the aquarium's animal collection of mammals, birds, reptiles, amphibians and fish. The laboratory offers on-site analysis in hematology (manual and automated), clinical chemistry, parasitology, cytology preparations, and microbiology. In addition, water chemistry testing is performed to maintain water quality for the aquariums 150+ aquatic systems. Proficiency in quality control, calibration and problem solving.
